ance Notes on Codes and Abbreviations" appearing at the begin-  
ning of each regular issue of the PCT Gazette.

(54) Title: FRAMESTRUCTURE FOR PARTITION WALLS OF BUILDING ROOMS

(57) Abstract: A frame structure for partition walls (P) of building rooms, comprising a plural-  
ity of substantially vertical and substantially horizontal elongate support members (2), which  
are mutually connected at their ends to define a substantially rigid framework. At least one  
elongate member (2) comprises a base profile (3) having at least one central portion (4) adapted  
to define a housing for the peripheral edges (R) of a partition wall (P) and two end portions (6)  
adapted to engage with lateral profiles (7) for accommodating the peripheral edges (R) of the  
partition wall (P). A peculiar characteristic of the invention consists in that the central portion  
(4) is substantially parallel to and offset from a geometric plane (G) defined by the end portions  
(6), so that the height of the housing (5) is increased, while maintaining the same transverse  
dimension of the elongate support members (2).
